ENHANCEMENTS

SUPPORT FOR DEFAULT OVERLAYS

No more need to hand-copy multiple overlays when you want the same one for several different content categories.

BRAINTREE SUPPORT

Braintree supported in new workflow, new admin configuration for Braintree settings.

AUTHORIZATION TRACKING RECORD UPDATE

System no longer attempts to send an Auth Tracking record to NCS Circulation for a subscriber with no active subscriptions.

TERMS AND CONDITIONS OPTION

Removed the requirement to have Terms and Conditions defined on plans in the New Workflow.

If a customer doesn't need explicit acknowledgement of T&Cs then just don't add them to your plan. The purchase process will still work even without the T&Cs.

FACEBOOK AND GOOGLE LOGIN SUPPORT

Updated Facebook login and added Google as optional login credentials for users.

VOUCHER REDEMPTION UPDATE

Optional function to capture billing address on Voucher Redemption even for digital only starts.

CIRCPRO API STATUS ITEM

System status for Address Validation (aka Satori).
