ENHANCEMENTS

CYBERSOURCE SUPPORT FOR INTEGRATED HOSTED ORDER PAGE

For Cybersource, while still limiting PCI compliance issues - The Hosted Order Form is now integrated, so there is no need to redirect or open additional tabs or windows to complete the transaction. None of the PCI compliance data is being stored in any form except where it is hosted by the payment processor.

ADDED ADDITIONAL DATA ENTRY VALIDATION ON ADDRESS FIELDS

SUBSCRIBER DETAILS API

API to allow 3rd party identifiers to get subscriber profile

The Digital Paymeter system can be integrated with third-party systems, for example, external identity providers (IDP) such as Gigya and LoginRadius. This API provides a means to fetch subscriber and subscription data based on the external systems user identification key. The endpoint accepts the external Id and the name of the identity provider that has been configured.

CANADIAN ADDRESS SUPPORT

LOGIN SDK

JavaScript library to allow customer to build their own custom logon, logout and status forms.

SUPPORT FOR FAVICON

Allows customer to submit their own custom favicon to create a consistent branding experience for readers.

NEW PLAN BY PURCHASE ORIGIN DATA EXTRACT

New API that allows customer to pull raw data for purchased plans that includes the new purchase 'origin' value. Origin refer's to where the user started in the process, like paywall or home page.
